

## EnergyWindow<sup>®</sup> At A Glance

EnergyWindow<sup>®</sup> is a Boulder, Colo.-based company that offers the comprehensive PowerTools<sup>™</sup> suite of information technology-based tools and extensive energy industry expertise to help businesses manage every element of their energy supply cycle. Specifically, EnergyWindow offers:

- The PowerQuote<sup>™</sup> online energy sourcing tool for energy procurement;
- The real-time, online PowerScape<sup>®</sup> energy market knowledgebase that tracks the best opportunities for energy procurement;
- The PowerMonitor<sup>®</sup> energy performance management information system that allows energy managers to track and analyze their company's energy usage; and
- Energy supply strategy and management consulting, using the PowerStrategy<sup>®</sup> energy management planning process.

The company serves **energy buyers** – large, commercial and industrial companies with multiple facilities that purchase and use significant quantities of natural gas and electricity to run their facilities. These buyers benefit because EnergyWindow's offerings reduce the cost, effort, risk and complexity of managing their energy supply.

EnergyWindow also serves **energy suppliers** – competitive electricity and natural gas suppliers and marketers that generate and sell natural gas and electricity to businesses. These suppliers benefit from EnergyWindow's products and services because they can quickly locate and qualify high-quality energy buyers, speed the bid process and, generally, develop business for a fraction of what it would cost and in much less time to develop the same business themselves or by using third-party energy brokers.
